PROS	Best solution for companies looking to access data for multiple use cases (eDiscovery, legal hold, internal investigations, compliance). All site and page data, including expanded metadata, available for review-ready exports built for eDiscovery use cases.	Quick process to build web pages / sites from collaborative Confluence workspaces.	Built for providing a quick way to migrate or rebuild Confluence spaces.	Simple process to turn collaboration Wiki spaces into product documentation.
CONS		Lacks inline comments and important metadata needed for forensics and eDiscovery.	Text and attachments stored seperately, increasing difficulty during review process.	Lacks rich metadata for forensic and eDiscovery use cases.
